

Program Flow and Access Modifier

1. Program to take the number at runtime and check whether the given number is positive or negative.
2. Check whether the student passed or failed and if he passed print which rank obtained.
3. Check the given character uppercase or lower case or digit or special character?
4. Print which number is biggest among two numbers.
5. Print square of each number up to 20.
6. Print “n” Even numbers.
7. Print sum of all even numbers b/w 1 to n.
8. Program to print the prime numbers from 1 to 10.
9. Print square of each number up to 20.
10. Print factorial of n.
11. Given number is perfect number or not.
12. Print the Fibonacci series up to n.
13. Find big digit in a number.
14. Program to Find Sum of Digits of a Number using Recursion.
15. Program to print the sum of alternative digits in a given number?
16. Program to print the no of occurrences of a digit in a number.
17. Program to whether all digits in a given number are equal or not?
18. Program to add the first and last digit of a given number?
19. Program to add even and odd digits of a given number?
20. Program to reverse a number?
21. Program to print prime numbers between m to n.
22. Program to print n prime numbers.
23. Program to print perfect numbers between m to n.
24. Program to print n perfect numbers.
25. Program to Print Armstrong Number between 1 to 1000.
26. Program to Find Sum of Natural Numbers.

44. How Python Access Modifiers is Useful for Programming in Python?

- Public
- Private
- Protected

45. create a different **package** with multiple classes.
