Professional Summary

AI and Machine Learning Engineer with strong hands-on experience in building, optimizing, and deploying intelligent systems, combined with solid frontend development skills. Proficient in developing end-to-end AI-driven applications with user-friendly interfaces, scalable ML pipelines, and clean version-controlled. Experienced in data analysis, deep learning, computer vision, and modern web technologies. Actively seeking roles in AI/ML engineering, applied data science, and AI-powered product development.

Education

Bachelor of Technology (B.Tech) in Computer Science & Engineering (AI & ML) 2022 – 2026
(Expected)

Gayatri Vidya Parishad College for Degree & PG Courses, Visakhapatnam

CGPA: 9.11 / 10 (Up to 6th Semester)

Internship Experience

Machine Learning Intern — AIMERS (Remote) May 2025 – July 2025

- Developed and optimized supervised and unsupervised ML models using **Scikit-learn, TensorFlow, Keras, and PyTorch**.
- Improved model accuracy by **18%** through feature engineering, hyperparameter tuning, and cross-validation.
- Reduced execution time by **25%** by optimizing data pipelines and model architectures.
- Automated complete ML workflows including data preprocessing, training, evaluation, and reporting.
- Collaborated using **Git and GitHub** for version control, code reviews, and collaborative development.

Key Projects

AI-Powered Fitness Coach (ML + Full-Stack Application)

- Built an intelligent fitness coaching system with **12 structured exercises** using ML-based recommendations.
- Implemented a personalized **diet planning module** based on user goals and health parameters.
- Developed an interactive frontend using **HTML, CSS, JavaScript, and Streamlit** for real-time user engagement.
- Integrated ML models with frontend components to deliver an end-to-end AI-powered user experience.

Amazon Product Price Prediction (Machine Learning Challenge)

- Designed regression-based ML models to predict product prices from large-scale Amazon datasets.
- Performed data preprocessing, feature engineering, and model evaluation using RMSE and R^2 metrics.
- Deployed model outputs through interactive dashboards for better business interpretation.

Drone Detection System using YOLO (Computer Vision)

- Developed a real-time drone detection system using **YOLO, OpenCV, and CNN architectures**.
- Achieved **92% detection accuracy** on live video streams and webcam feeds.
- Reduced false positives by **17%** via confidence tuning and dataset balancing.

Certifications

- **Introduction to Large Language Models (LLMs)** — NPTEL
- **Deep Learning for Natural Language Processing** — NPTEL
- **Introduction to Generative AI** — edX
- **Introduction to Deep Learning** — Infosys Springboard
- **Computer Vision 101** — Infosys Springboard
- **Introduction to Data Science** — Infosys Springboard

Technical Skills

Programming Languages: Python, JavaScript, C++, SQL , Java

Machine Learning & AI: Supervised Learning, Unsupervised Learning, Deep Learning, CNNs, Model Evaluation, Hyperparameter Tuning

Frameworks & Libraries: Scikit-learn, TensorFlow, PyTorch, Keras

Frontend Development: HTML5, CSS3, JavaScript (ES6), Responsive Web Design, UI Development

Data Analytics: Pandas, NumPy, Feature Engineering, Data Cleaning, Data Visualization

Computer Vision: OpenCV, YOLO, Image Processing

Development Tools: Git, GitHub, Version Control, CI/CD Basics, Streamlit, Jupyter Notebook, Google Colab

Soft Skills

Analytical Thinking, Problem Solving, Logical Reasoning, Quantitative Aptitude, Team Collaboration, Communication Skills, Adaptability, Continuous Learning

Languages

English, Hindi, Telugu
